EXPERIENCE

TomTom, Pune — Software Engineer

May 2021 – current

- Written multiple automation scripts in **Python**
- Product deployment on **Amazon Web Services** by creating highly available architecture alongside **Docker**.
- Reduced product deployment time by automating the build process using **Jenkins**.
- Stored and processed big data using **MongoDB**
- Scrapped publicly available information over the internet using **Scrapy framework**.

TomTom, Pune — Associate Software Engineer

JUL 2018 – May 2021

- Created multiple dashboards to store and retrieve information using **angular** and **react** technology and backend as **MySQL**.
- Designed microservice architecture through REST APIs using **spring boot** framework.

SKILLS

Angular, Python, AWS, Linux, GIS, JavaScript, Scrapping, React (Novice), Flask, Spring Boot, GIT, MYSQL, MongoDB, Jenkins, Docker, REST architecture, HTML, CSS, Bootstrap, Network security, UI/UX, TypeScript, Agile, SEO

EDUCATION

Walchand college of engineering sangli, sangli — BTECH IT

JUN 2014 - MAY 2018

CPI – 7.03

PROJECTS

- **SDP –**
A central platform for data processing and data manipulation which produces some valuable information for our map making units.
- **TomTom Bot –**
A web scrapping project built to crawl all available public information over the internet and provide some meaningful updates to our map product.
- **Number plate detector –**
A python-based image processing project where numbers get extracted from vehicle number plates and respective owner details are provided.
- **Watch Docs –**
A python-based NLP project which categorizes documents in different labels using semantic analysis.

LANGUAGES

English, Marathi, Hindi

SOFT SKILLS

- Leadership
